Journal of Fluid Mechanics Volume 396 **10 October 1999**

W. Choi & R. Camassa	Fully nonlinear internal waves in a two-fluid system	1
L. Brevdo, P. Laure, F. Dias & T. J. Bridges	Linear pulse structure and signalling in a film flow on an inclined plane	37
D. M. Mason & R. R. Kerswell	Nonlinear evolution of the elliptical instability: an example of inertial wave breakdown	73
C.-W. Wang & Z. Rusak	Numerical studies of transonic BZT gas flows around thin airfoils	109
J.-H. Shyu & C.-C. Tung	Reflection of oblique waves by currents: analytical solutions and their application to numerical computations	143
A. Javam, J. Imberger & S. W. Armfield	Numerical study of internal wave reflection from sloping boundaries	183
B. D. Storey & A. J. Szeri	Mixture segregation within sonoluminescence bubbles	203
B. S. Brook, S. A. E. G. Falle & T. J. Pedley	Numerical solutions for unsteady gravity-driven flows in collapsible tubes: evolution and roll-wave instability of a steady state	223
T. Gotoh & R. S. Rogallo	Intermittency and scaling of pressure at small scales in forced isotropic turbulence	257
K. K. S. Buck, S. R. Dungan & R. J. Phillips	The effect of solute concentration on hindered gradient diffusion in polymeric gels	287
R. J. Lingwood & N. Peake	On the causal behaviour of flow over an elastic wall	319
BOOK REVIEW		
	Scaling Limits and Models in Physical Processes, by C. Cercignani & D. H. Sattinger	345
INDEX TO VOLUME 396		347
SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS		348

CAMBRIDGE UNIVERSITY PRESS
